WORK EXPERIENCE

Project 1: Anime Database   (Feb 2023 - Mar 2023)

Anime Database is an online database for anime and manga, where users can search, read story briefs and sign up to create their watchlists & read lists.

Technologies used: HTML, CSS, React, JS, Mongoose, Graphql, Rest API,nodejs Bootstrap.

- Created an **authentication** functionality using the JWT library and built a database using **mongoose** for storing user information.
- Created an API for calling data from the **database** by using **graphql**.
- Fetched data from third-party API to populate on the front end.
- Used **React framework** to create a number of components like the navigation bar and top anime page.
- Styled the website using CSS **and bootstrap** to make it **mobile-responsive.**
- Collaborated with the team for creating project structure.
- Git Hub

Project 2: Custom PC Builder   (Dec 2022 - Jan 2023)

Custom PC Builder is a website that can be used to build dream custom PCs where users can log in or sign up to obtain knowledge on various parts and their prices. It also provides users with pre-built options to select and compare against.

Technologies used: HTML, CSS, JS, Rest API, node.js, No SQL(sequelize), handlebars.

- Created a database using **sequelize library** and built relations between tables.
- Created **routes** for GET, POST, DEL, and PUT requests using the **express library**.
- Fetched data from the database by calling API using the fetch function.
- Created a login signup functionality using **connect-session-sequelize.**
- Developed a signup page, to capture user details and used it for user authentication.
- Git Hub

WORK EXPERIENCE

Project 3: Workout Builder   (Oct 2022 - Nov 2022)

Workout Builder is a website for beginners and workout enthusiasts to learn about exercise options based on different muscle groups and the right methods to perform these exercises.

Technologies used: HTML, CSS, Bootstrap, JS, Rest API.

- Created the structure of the homepage and navigation bar using HTML.
- Styled the website using CSS & Bootstrap.
- Developed a modal popup form on the homepage where user can enter their details, and select muscle groups.
- Defined a function for setting user data in the local storage once they click submit button.
- Collaborated with the team for creating a project structure and UI.
- Created multiple wireframes using adobe xd.
- Git Hub

Clickworthy (Canada)   (Aug 2021 - Present)

Technologies used: WordPress, Woo-Commerce, CSS.

Tools used: Adobe Xd, Elementor Pro.

- Created layouts, wireframes & different lead-generation landing pages for clients to expand their business all over the world.
- Designed high & low-fidelity models and helped to create a human-centric design.

Nomads Skillshare (Bali)   (Oct 2020 - Present)

Technologies used: WordPress, Woo-Commerce.

Tools used: Adobe Xd, Elementor Pro.

- Built a ticketing/e-commerce platform for the organization with the objective of increasing revenue and expanding its reach.
- Developed frameworks, and fidelity models to create a smooth experience during the whole customer journey.
- Developed and launched the website in less than a month.
