WORK EXPERIENCE

WEB DEVELOPER & DESIGNER

Project 1: Anime Bootcamp   Feb 2023 - Mar 2023

Anime Bootcamp is an online database for anime and manga, where users can search, read story briefs and sign up to create their watchlists & read lists

Technologies used: HTML, CSS, React, JS, Mongoose, Graphql, APIs,nodejs Bootstrap.

- Created an **authentication** functionality using the JWT library and build a database using **mongoose** for storing user information.
- Worked on calling data from the **database** using **graphql** by defining **mutations and queries**.
- Created a number of components using **react framework**.
- worked on the styling of the website using CSS and **bootstrap** and made it **mobile-responsive** and eye-catching.
- Created multiple wireframes & web prototypes based on requirements.
- Git Hub

Project 2: Pc Builder   Dec 2022 - Jan 2023

Custom PC Builder is a website that can be used to build dream custom PCs where users can log in or sign up to obtain knowledge on various parts and its prices. It also provides users with pre-built options to select and comapre against.

Technologies used: HTML, CSS, JS, No SQL(sequelize), APIs, handlebars,node.js

- worked on creating the database using **sequelize library** and in that, I created relations between tables.
- Created **routes** for GET, POST, DEL, and PUT requests using the **express library**.
- Created a **login signup functionality** using connect-session-sequelize and also worked on the front-end part of the login-signup page like storing data while the user signup and calling and checking data from the database if a user is logging in.
- Git Hub

WORK EXPERIENCE

WEB DESIGNER AND DEVELOPER

Project 3: Git Up Now   Oct 2022 - Nov 2022

Git Up Now is a website for beginners and workout enthusiasts to learn about exercise options based on different muscle groups and the right methods to perform these exercises

Technologies used: HTML, CSS, Bootstrap, JS, APIs.

- Created homepage and nav bar using HTML and made it look eye-catching and mobile responsive.
- worked on the modal popup form on the homepage where user can enter their email, name, and select muscle groups
- Created a function where user data get stored in the local storage once they click on submit button on the pop-up form.
- Created multiple wireframes & web prototypes based on requirements.
- Git Hub

Clickworthy (Canada)   Aug 2021 - Present

- Created layouts, wireframes & different lead-generation landing pages for their clients to expand their business all over the world
- Designed high & low-fidelity models and helped them in creating a human-centric design.
- Technologies used: WordPress, Woo-Commerce, CSS
- Tools used: Adobe Xd, Elementor Pro.

Nomads Skillshare (Bali)   Oct 2020 - Present

- Built a ticketing/e-commerce platform for the organization with the objective of increasing revenue and expanding its reach.
- Developed frameworks, and fidelity models that helped to create a smooth experience during a customer journey.
- Developed and launched the website in less than a month.
- Technologies used: WordPress, Woo-Commerce.
- Tools used: Adobe Xd, Elementor Pro.
